

System: Aurora Utility DER Orchestration and Storm Response Platform

Classification: Restricted

Deployment: Hybrid cloud plus OT control zones

Regulatory Scope: NERC CIP, NIST, ISO 27001, PCI DSS

Trust Boundary: Public Customer and External Partner Edge

Contains:

- Identity Gateway [api_gateway]
- API Mediation Gateway [api_gateway]
- Public Outage Status Publisher [serverless]

Trust Boundary: Utility Identity and Corporate Core

Contains:

- Workforce Identity Directory [managed_service]
- Vendor Access Broker [process]

Trust Boundary: Cloud Operations Control Plane

Contains:

- Outage Command Center [process]
- DER Orchestration Engine [process]
- Load Forecasting Service [process]
- Work Order Dispatch Service [process]
- Break-Glass Dispatch Console [process]
- AMI Ingestion Broker [managed_service]

Trust Boundary: OT Operations Zone

Contains:

- AMI Meter Mesh [external_entity]
- SCADA / ADMS Interface [process]
- Substation Edge Gateway [container]
- Firmware Signing Service [process]
- Grid Telemetry Historian [data_store]

Trust Boundary: Restricted Customer and Settlement Data Zone

Contains:

- Customer and Billing Data Hub [data_store]
- Market Settlement Ledger [data_store]
- Audit and Decision Vault [data_store]
- Operations Data Lake [data_store]

Trust Boundary: Field and Mobile Edge

Contains:

- Field Technician Tablet [human_actor]

Trust Boundary: Vendor Support Enclave

Contains:

- Vendor Support Enclave [external_entity]

Trust Boundary: Regulatory and Emergency Coordination Exchange

Contains:

- ISO Market Operator API [external_entity]
- Municipal Emergency Operations Center [external_entity]

Critical flows:

- DER Aggregator Partner -> API Mediation Gateway: DER flexibility availability feed
- ISO Market Operator API -> DER Orchestration Engine: market dispatch and curtailment schedule
- AMI Meter Mesh -> AMI Ingestion Broker: meter telemetry burst
- Load Forecasting Service -> DER Orchestration Engine: load shed and restoration recommendation
- DER Orchestration Engine -> SCADA / ADMS Interface: DER setpoint and feeder reconfiguration request
- Vendor Access Broker -> SCADA / ADMS Interface: approved vendor diagnostic session
- Break-Glass Dispatch Console -> DER Orchestration Engine: emergency override command
- Break-Glass Dispatch Console -> Audit and Decision Vault: break-glass approval record
- Work Order Dispatch Service -> Field Technician Tablet: offline work package and switching steps
- Public Outage Status Publisher -> Customer Mobile App: push outage notification
